DETAILED ACTION

This is to acknowledge the receipt of "Amendment after Final" filed on 8/20/2009.

Status of Claims

Claims 1-14, 16, and 17 are cancelled; claims 15, 18, and 21 are amended; claims 15 and 18-21 are pending. Claim 21 is an independent claim.

Status of the Previous Rejections

The previous rejection of claims 15 and 21 under 35 U.S.C. 103 (a) over Yamakawa et al (JP 11139877 A, thereafter JP'877) in view of Komatsu (US 6,242,374 B1, thereafter US'374) is withdrawn in view of the Applicant's "Remarks/amendment" filed on 8/20/2009.

The previous objection of claims 16, 18-20 as being dependent upon a rejected base claim is withdrawn in view of the Applicant's "Remarks/amendment" filed on 8/20/2009.

Allowable Subject Matter

Claims 15 and 18-21 are allowed.

The following is an examiner's statement of reasons for allowance:

JP'877 teaches a method of mixing Si_3N_4 powder and metal Ti powder and sintering to obtain sintered compact (Abstract of JP'877), which reads on the limitations of providing metal powders; providing Si_3N_4 powder; blending and sintering the powders

Art Unit: 1793

as recited in the steps a), b), and c) of the instant independent claim 21. However, JP'877 does not specify that the sintering aid is MgO and JP'877 does not specify the providing elemental W in the target. The second reference US'374 teaches that the MgO is used as an addition component to promote a function as rare earth element and to enable the sintered body to be densified at a low temperature range (Col.7, line 66 to Col.8, line 14 of US'374) and US'374 teaches the Ti and W are changeable in term of adding as additives in the mixture for making sintering Si_3N_4 body (Abstract, Col.2, lines 49-62, Col.8, lines 55-63, and claim 5 of US'374). However, the Applicants provide "Rule 132 Declaration" and show that MgO is hygroscopic which is different to the sinter aids Al_2O_3 and Y_2O_3 as used in JP'877, and the W powder has vastly different blending capability compared to the Ti powder as used in JP'877 since the large density difference between these components. The arguments are persuasive and claims 15, and 18-21 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delay, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on statement of Reason for Allowance".
